

Version 1 — Word-by-Word Transcript with Speaker Labels

Prepared by: Manus AI

Source file: AUDIO-2026-05-19-15-04-36.m4a

Audio duration: approximately 53 minutes and 52 seconds

Note on speaker labels: The speech-to-text output did not include formal diarization. The labels below are inferred from conversational context and grouped into the two-speaker format requested. Where brief interjections from additional voices appear, they have been assigned to the closest functional role.

- [1] Speaker 2: I'm like, this is not, I'm like, this is not us.
- [2] Speaker 2: I'm like, he did not get a verbal license.
- [3] Speaker 2: This is his resident state.
- [4] Speaker 2: I'm like, oh my God.
- [5] Speaker 2: Yeah, that's crazy.
- [6] Speaker 2: You can only do so much.
- [7] Speaker 2: And I'm like, oh my, what else happened here?
- [8] Speaker 2: I'm like, is it us?
- [9] Speaker 2: I'm like, I'm sweating.
- [10] Speaker 2: And I'm like, all right.
- [11] Speaker 2: I'm like, it's not us.
- [12] Speaker 2: I'm like, I don't know how that was missed that he never got a verbal license.
- [13] Speaker 2: Out of Columbus, was it Columbus, Northern Ohio or Cincinnati?
- [14] Speaker 2: I can tell you.
- [15] Speaker 1: Do you know what geo?
- [16] Speaker 2: Um, I don't know what geo.
- [17] Speaker 1: Okay.
- [18] Speaker 1: So I was going to say, I can probably know.
- [19] Speaker 2: I'm just so thankful.
- [20] Speaker 2: Um, it's D 59.
- [21] Speaker 2: D 59.
- [22] Speaker 1: Okay.
- [23] Speaker 1: That's not one of mine.
- [24] Speaker 1: Sorry.
- [25] Speaker 2: That's me.
- [26] Speaker 2: Oh, sorry.

[27] Speaker 2: Like I said, I'm like, we canceled the appointments and registration in error.

[28] Speaker 2: So that part, I'm like, I said to Marissa, I'm like, oh, that's.

[29] Speaker 2: Yeah, that's on us.

[30] Speaker 2: But, um, we didn't catch it in time.

[31] Speaker 2: And, um, I'm just like, oh God, that there's more issues.

[32] Speaker 2: And like, I see everywhere on the email today.

[33] Speaker 2: I'm like, oh God, they could go away.

[34] Speaker 2: Make it go.

[35] Speaker 1: Hey, yo, how are we doing?

[36] Speaker 2: You're at a party.

[37] Speaker 2: Pretty good.

[38] Speaker 2: As ready to start this journey.

[39] Speaker 2: Heck yeah.

[40] Speaker 2: Heck yeah.

[41] Speaker 2: Wonderful world of folks exiting the company.

[42] Speaker 2: How exciting.

[43] Speaker 2: Oh, I know.

[44] Speaker 2: I know there's a lot of tentacles to this.

[45] Speaker 1: Yes.

[46] Speaker 1: Anything to simplify it.

[47] Speaker 2: Yes.

[48] Speaker 2: That's the goal.

[49] Speaker 1: Automation, simplification and outright, um, dissolution of some components.

[50] Speaker 2: Right.

[51] Speaker 1: So, um, could you, I don't know how we want to start this.

[52] Speaker 1: I had some ideas, right.

[53] Speaker 1: Uh, so writing by myself and, uh, and Rocco, I've been going through the user

[54] Speaker 1: stories we have had drafted over the years for this and they are extensive.

[55] Speaker 1: We've done a lot of good prep work.

[56] Speaker 1: Uh, cause we've said, you know, we've started and stopped, uh, discussions around

[57] Speaker 1: this, so we're finally here.

[58] Speaker 1: Uh, we're about as committed as we have been, um, to date on this.

[59] Speaker 1: So, uh, I'd like to get moving and make sure we're ready.

[60] Speaker 1: Right.

[61] Speaker 1: Uh, when the time comes to pick this stuff up.

[62] Speaker 1: So, um, Kathleen, would you be in a position to maybe walk us through today?

[63] Speaker 2: Right.

[64] Speaker 1: Just at a high level.

[65] Speaker 1: Um, maybe, uh, some sample screens in ACS or something just, uh, mainly

[66] Speaker 1: for myself and Serena, right.

[67] Speaker 1: We know Rocco's familiar with it, but, um, uh, on how, you know, all the

[68] Speaker 1: different permutations of a termination and all the different activities

[69] Speaker 1: that your team, right.

[70] Speaker 1: Accounts for.

[71] Speaker 2: Yeah.

[72] Speaker 2: Like really high level.

[73] Speaker 2: It starts at the geo level.

[74] Speaker 2: So whether like resignation, termination, withdrawal, it's all at the

[75] Speaker 2: geo level.

[76] Speaker 2: It doesn't matter.

[77] Speaker 2: Yeah.

[78] Speaker 2: So one size fits all right.

[79] Speaker 2: One size fits all the geos propel the process.

[80] Speaker 2: Um, so yeah, they go into ACS.

[81] Speaker 2: Let's see.

[82] Speaker 2: So I can get a good one.

[83] Speaker 2: Everybody looks so excited this afternoon.

[84] Speaker 1: Right.

[85] Speaker 2: I want to bring up what it looks like for them.

[86] Speaker 1: Okay.

[87] Speaker 2: So they go in here.

[88] Speaker 2: I think it's pretty easy.

[89] Speaker 2: They fill out what we call it a 1541.

[90] Speaker 2: This is current state, obviously.

[91] Speaker 2: So like really basic information, like when did they intention to leave?

[92] Speaker 2: When did they learn about it?

[93] Speaker 2: Effective date.

[94] Speaker 2: And this is probably the part where they screw up the most, like reason for

[95] Speaker 2: termination.

[96] Speaker 2: Sometimes they screw it up.

[97] Speaker 2: Um, as we find out later, like the one problem that we have right now, I'm
[98] Speaker 2: going to try not to get, um, off track, but one, one major problem we have
[99] Speaker 2: right now, I think Marissa or an email about this is that they don't properly
[100] Speaker 2: indicate someone's retired and active.
[101] Speaker 2: I think it's because it's under this screen.
[102] Speaker 2: Yeah, this, I guess the biggest challenge I have today is them
[103] Speaker 2: properly filling the screen out.
[104] Speaker 1: So how, tell me how you would solve for that.
[105] Speaker 1: How would the system help you make that determination that
[106] Speaker 1: someone's retired and active?
[107] Speaker 2: Obviously we know we're going to go when you're in auto terms, our plan is
[108] Speaker 2: to automatically create those tasks and this field will be, you know, hard
[109] Speaker 2: coded with that because it was created based off an auto term feed.
[110] Speaker 2: So we can solve for those.
[111] Speaker 1: But how would you guard against someone from selecting retired and
active?
[112] Speaker 2: Yeah, that's hard to erroneously.
[113] Speaker 1: Like how, what cue would you have in the system?
[114] Speaker 1: Can we add
[115] Speaker 1: Like another reason for termination.
[116] Speaker 1: You know, you got resigned, you got terminated.
[117] Speaker 1: What if we add a, I guess we're building this out at retired?
[118] Speaker 1: Instead of lumping retired in either resigned or
[119] Speaker 1: terminated, make it like it's owned.
[120] Speaker 1: Is that the problem?
[121] Speaker 2: Cuz that's the, there's just confusion about the definition.
[122] Speaker 2: Yeah.
[123] Speaker 2: Yeah, so I think it's because retired and active is under terminated.
[124] Speaker 2: I think retired and active.
[125] Speaker 2: I mean, we could, yes, no, absolutely.
[126] Speaker 2: We don't have to build a radio button, right?
[127] Speaker 2: Yeah.
[128] Speaker 2: I think you can, or build these three radio buttons.
[129] Speaker 2: You can build a retired one, right?
[130] Speaker 2: Yeah, I think we can solve for that.
[131] Speaker 2: I thought the problem was different.
[132] Speaker 2: I'm sorry.

[133] Speaker 1: All right, so, Rocco, I think our vision was for the ladies,
[134] Speaker 1: much like we did with the Eagle task.
[135] Speaker 1: We're gonna build these fields all right into the task, right?
[136] Speaker 2: Yeah, well, just the reason, the date kind of a thing, right?
[137] Speaker 2: But the rest of this stuff, we're not even gonna do.
[138] Speaker 1: We're not?
[139] Speaker 2: 1541's gone, we're not doing any of these questions.
[140] Speaker 1: So we don't need to worry about all the questionnaire portion anymore?
[141] Speaker 2: No, no, that's all gone.
[142] Speaker 2: That was the streamlining process, was to eliminate this.
[143] Speaker 2: We're utilizing various things that happen within the onboarding process, right?
[144] Speaker 2: Are there category issues, that type of activity, right?
[145] Speaker 2: Think about it, guys.
[146] Speaker 2: We know that there's a cap added out.
[147] Speaker 2: We know if you're registered, right?
[148] Speaker 2: We know what license and appointments you have.
[149] Speaker 2: So what's left of these questions that we don't know,
[150] Speaker 2: that the system can't do the work for us, right?
[151] Speaker 2: And half the time, the GO gets it wrong anyway.
[152] Speaker 2: They do, they do, they've been getting it wrong.
[153] Speaker 2: I pull my hair out of them.
[154] Speaker 2: For the last 25 years since we've brought this thing, it just makes no sense.
[155] Speaker 2: So, like Nix was saying, the original plan, I don't know if Natasha,
[156] Speaker 2: if you, or Christine, if you remember when we went through these requirements a while,
[157] Speaker 2: long time ago, with compliance on the phone.
[158] Speaker 2: And we pitched it to get rid of the 1541 and utilize the CAT-1.
[159] Speaker 2: And for the first time in my life, Margaret actually agreed with me, right?
[160] Speaker 2: To do that.
[161] Speaker 2: So, that was the plan, right?
[162] Speaker 2: And, you know, the object is to get rid of all these questions, right?
[163] Speaker 2: Now, some of these you may want, right?
[164] Speaker 2: But so much of this would be automated.
[165] Speaker 2: It wouldn't matter, right?
[166] Speaker 2: Like you asked a question, did the GO terminate all the associated persons, right?

[167] Speaker 2: Well, this stuff will be so interconnected.

[168] Speaker 2: At the time the GO is going to, like, terminate them, right?

[169] Speaker 2: That'll just pop up.

[170] Speaker 2: Hey, you've got these four other affiliations.

[171] Speaker 2: What do we do with them?

[172] Speaker 2: Right then and there.

[173] Speaker 2: You know, we don't need to go back and ask if we found something or whatever, right?

[174] Speaker 2: It should happen right away.

[175] Speaker 2: So, that's where all the automation comes into this.

[176] Speaker 2: And that's why a lot of these questions are not really going to be necessary to be answered, right?

[177] Speaker 2: That's why we decided not to do it anymore.

[178] Speaker 2: So, even if it's a 20-year agent that's resigning, we don't have to answer, like,

[179] Speaker 2: those business misconduct questions or anything.

[180] Speaker 2: We're assuming we're going to pull that from somewhere else.

[181] Speaker 2: No, because basically when you get a 20-year agent, right?

[182] Speaker 2: The managing partner can't authorize that person, right?

[183] Speaker 2: Only the zones can or standards.

[184] Speaker 1: Okay, yes.

[185] Speaker 2: So, guess what?

[186] Speaker 2: Only the zone can initiate it.

[187] Speaker 2: It's not up to the GO anymore.

[188] Speaker 2: The zone would have to go in and say, terminate Natasha.

[189] Speaker 2: And the GO can manage it, right?

[190] Speaker 2: It would go to the GO to manage the rest of this process.

[191] Speaker 2: But the GO, the zone is ultimately responsible.

[192] Speaker 1: Right now, what do they call the GO?

[193] Speaker 2: Input the 1541.

[194] Speaker 2: The GO's doing a lot of the zones' work right now.

[195] Speaker 2: Email them for it.

[196] Speaker 2: It's terrible.

[197] Speaker 1: Yeah.

[198] Speaker 1: So, therefore, the system will drive it.

[199] Speaker 1: They can create it.

[200] Speaker 2: They don't fire a lot of people all the time.

[201] Speaker 2: Maybe around production time, quarterly or whatever.

[202] Speaker 2: You know, Charmaine can, you know, do something.

[203] Speaker 2: That's the way I look at it.

[204] Speaker 2: So, like, any agent that's, like, established, that would be prompted from the zone.

[205] Speaker 2: The zone or standards.

[206] Speaker 1: That makes so much sense.

[207] Speaker 2: And if they've resigned, let's assume this stuff doesn't apply.

[208] Speaker 1: Yep.

[209] Speaker 1: I love it.

[210] Speaker 1: Depending on the reason, right?

[211] Speaker 1: That's basically you're building a rules engine behind the scenes as to what's going on.

[212] Speaker 1: I love it because the GO's get involved.

[213] Speaker 1: Then they input.

[214] Speaker 1: I get the emails, copy the terms mailbox.

[215] Speaker 1: The zone's term reading this person.

[216] Speaker 1: They get 30 days.

[217] Speaker 1: And then the GO winds up submitting the 1540 wording correctly.

[218] Speaker 1: And I know that because I'm looking at the email in the IPS mailbox.

[219] Speaker 1: And I'm like, oh, my God.

[220] Speaker 1: So, it makes so much sense that the zone would prompt that.

[221] Speaker 1: And then you also have to be, you know, be carefully permitted to resign once as well.

[222] Speaker 1: If you want to keep an eye on those.

[223] Speaker 1: We'll have to talk about how to manage those.

[224] Speaker 2: Yeah, yeah.

[225] Speaker 1: Well, that was going to be my next question, Rocco.

[226] Speaker 1: Can you create some logic in the system based on like the contract type and the year?

[227] Speaker 2: Yep.

[228] Speaker 2: Oh, yeah, absolutely.

[229] Speaker 2: Anything that's not TAS.

[230] Speaker 2: Anything that's greater than TAS is a zone initiated.

[231] Speaker 2: Yeah, the GO can't even create the thing, right?

[232] Speaker 1: Nope.

[233] Speaker 2: PTAS and TAS are the only two the MP can just fire it.

[234] Speaker 2: Because they're at will, right?

[235] Speaker 2: The MP can do whatever he wants.

[236] Speaker 2: It's the established ones.

[237] Speaker 1: So, from a contract type, right, Nick?

[238] Speaker 1: You're looking at 2.0, what's their current contract?

[239] Speaker 2: Yep.

[240] Speaker 2: You know, N10.

[241] Speaker 2: All right, you can't do it, right?

[242] Speaker 1: You should send a warning, submit to the zone or something, right?

[243] Speaker 2: Yep.

[244] Speaker 2: But we're still allowing established folks to resign.

[245] Speaker 1: The GO have control of that.

[246] Speaker 2: No, they could do that.

[247] Speaker 2: Yeah, if that's if that's the current procedure, then, yeah, that's fine. Or does the zone have to look at it.

[248] Speaker 2: There is 1 thing for if they're retiring and they're established, can't they only.

[249] Speaker 2: They had to write a resignation letter and it has to be the 1st of the month 1st of the month. Yep.

[250] Speaker 2: They can resign any time they want, but we won't process it to the 1st of the month because of pension concerns. Yeah, so that's like a thing, a rule of some sort, like a.

[251] Speaker 2: Yeah, it's retiring active is always the 1st of the month. Yeah, they get that wrong all the time. Yeah.

[252] Speaker 1: Yeah, well, again, it's the next point, right? So is that a new button or in the drop down? Maybe you got to segregate those so they don't make that mistake.

[253] Speaker 1: And then the system knows they selected this. Oh, that's what we hold it till the 1st of the month or something.

[254] Speaker 1: I don't know the system automatically. OK, if I choose retired inactive, the system automatically defaults to the 1st of the following month and then it just processes it.

[255] Speaker 1: Then we can send it to FDA. Yes. Right. Kathleen, with the advanced date, it takes. Yeah, it takes it. Yeah, I don't take it now.

[256] Speaker 1: So you can just be submitted, but it automatically is that dangerous, though?

[257] Speaker 1: Or do you build a queue of like pending terminations that they can unwind before the 1st of the month that they needed to?

[258] Speaker 1: Now, that's that's a thought to. I mean, for like if I'm an established agent and I'm being terminated, I get my 30 days.

[259] Speaker 1: Geo processes this the same day they get the letter from the zone and marketer updates with the date that's, you know, 30 days in advance.

[260] Speaker 1: Yep. Yeah. How many of those need reversal? Like, yeah, you know what I mean?

[261] Speaker 2: Well, it's funny because the last patch I've had had reversals, especially Northeast Zone came back and said, oh, no, we're not.

[262] Speaker 2: She's we're giving her more time. There was a few of them. So, yeah, it does get reversed.

[263] Speaker 1: So it doesn't make sense. And we can weigh the cost, right?

[264] Speaker 1: Of building a queue and holding these right from downstream processing.

[265] Speaker 1: But if that makes sense, then that's something we can kind of like that.

[266] Speaker 1: Yeah, because they do retract. Yeah. Of course they do.

[267] Speaker 2: And yeah, it's really only the zone can go in. Right. And I don't know. It depends on the termination, right?

[268] Speaker 2: Is it an established agent? Is it a TAS agent? It's an auto term, right?

[269] Speaker 2: Auto terms. We thought we would direct to the zone and let them decide what to do with them.

[270] Speaker 2: That's great. Yeah. A lot with the TAS auto terms, like every time it's Nikki always helps me out or Lisa, like the zone comes back and the 1541 is already submitted.

Speaker 2: [13:32.0 - 13:38.3] And they're like, oh, no, we need to reinstate this person. No, we you know, it's we're special handling this one.

Speaker 2: [13:38.3 - 13:43.3] Like, there's always a batch where they want to they want to take it back when it's like the day of the TAS auto term.

Speaker 2: [13:43.3 - 13:49.0] So there's a lot of retracting in this process. Right. Wait, don't do it.

Speaker 2: [13:49.0 - 13:53.3] That's a lot of it. And we've already done it. That's been a big challenge with this process.

Speaker 1: [13:54.3 - 14:11.1] Oh. Yeah, well, we could talk through that, you know, the auto terms, right, the zones, they're all on board because they're the ones that ultimately decide whether or not to finalize it.

Speaker 2: [14:11.1 - 14:16.8] Right. Here's this. Exactly. But again, you don't want to hit them with 50 of them either. Right. Sometimes they forget.

Speaker 2: [14:16.8 - 14:22.6] I know Northeast sometimes forgets to process them at all and then you have to go back and do it.

Speaker 2: [14:22.6 - 14:30.2] So that's a conversation, right, to bring up when you're talking with the zones that this is the suggestion, like to send them to you just to double check.

Speaker 1: [14:30.2 - 14:34.7] And if you say yes, then it just happens. Yeah. Right. Versus no.

Speaker 1: [14:34.7 - 14:42.8] And then that you could go into Verison and unwind it. Right. In case they don't do it.

Speaker 1: [14:42.8 - 14:48.7] Now, that's a thought. Right. You try to cut down on those kinds of things.

Speaker 2: [14:48.7 - 14:53.7] Yeah, but that's like it has to happen before it even comes to us. Right, Rocco?

Speaker 2: [14:53.7 - 14:60.0] Well, technically, they're supposed to go in just before the end of the month and say who's on, who's in, who's out. Right.

Speaker 2: [14:60.0 - 15:05.5] The jails ask for exceptions. They go into Verison. I believe it's in Verison. I used to be in my marketer.

Speaker 2: [15:05.5 - 15:08.8] I think it's embarrassing. They go in and they remove them from the auto term process.

Speaker 2: [15:08.8 - 15:17.6] And that happens before the auto term occurs. But sometimes they don't get to them or there's an emergency appeal after the fact.

Speaker 2: [15:17.6 - 15:25.1] That's why we don't update FDAS until like five business days after the auto. Something like that. Right.

Speaker 1: [15:25.1 - 15:27.4] What is it, five days? Five business days?

Speaker 2: [15:27.4 - 15:34.7] There's always, yeah, like this process. There's always, I feel like, I don't know, the time that I've been very close to it.

Speaker 2: [15:34.7 - 15:39.3] There's always been like someone's changing their mind. Hold it. Don't process to 1541.

Speaker 2: [15:39.8 - 15:48.9] Another big issue that we see is that quite recently, like it's the other codes.

Speaker 2: [15:48.9 - 15:57.5] So it's like, oh, this person is being terminated or residing, sorry, usually residing under one code, but they have a new role now.

Speaker 2: [15:57.5 - 16:03.5] And now we want them to have this new code number, but don't terminate the appointments or the registration.

Speaker 2: [16:03.5 - 16:09.8] So managing that today is quite challenging, and sometimes we catch those and sometimes they don't.

Speaker 2: [16:09.7 - 16:13.8] It's a matter of how good the geos communicate to us on those, but the other codes

Speaker 2: [16:14.5 - 16:21.4] Very difficult. Oh, here's here's this thing right going forward and personally. I don't think you need to do this anymore

Speaker 1: [16:23.3 - 16:29.5] You can do it or just let the system process it right, but you're gonna have to recontract them right under a new P

Speaker 1: [16:29.5 - 16:31.1] Test right? I don't know what you do today

Speaker 1: [16:31.1 - 16:36.7] But they have to go through the whole process right BGR PDB's big all that goes under the new code number

Speaker 2: [16:37.3 - 16:40.7] Yeah, yeah the bigger problem becomes the

Speaker 2: [16:41.7 - 16:43.9] agent becoming an LSA

Speaker 2: [16:46.1 - 16:53.4] Those are the bigger ones where it's you know, we can't terminate those appointments because they want to move them right over

Speaker 1: [16:55.8 - 16:58.4] What's the worst-case scenario that happens

Speaker 2: [16:59.9 - 17:04.0] Well, if you've got a bunch of them an agent and I'm gonna become an LSA

Speaker 2: [17:04.6 - 17:07.3] If we terminate all those appointments now

Speaker 2: [17:07.9 - 17:13.2] The agent that I'm gonna be working at as an LSA is now paying all the licensees

Speaker 2: [17:13.5 - 17:17.1] Associated with my LSA said they've got five non-resident licenses

Speaker 2: [17:17.1 - 17:21.2] all those fees need to get paid again and the agents paying all of those or

Speaker 2: [17:22.0 - 17:23.7] even if I'm a

Speaker 2: [17:23.7 - 17:28.2] LSA and I want to become an agent if we terminate those appointments now the agent has to

Speaker 2: [17:28.4 - 17:33.6] Repay all those appointment fees and everything like that. It is there is a cost factor involved to the

Speaker 2: [17:35.0 - 17:41.4] Agent agent assistant all of that, you know, plus it's double work for the Kathleen's team now. We're reappointing or re-registering

Speaker 1: [17:43.1 - 17:47.2] Lay this out right because now you're talking new contract type, right?

Speaker 1: [17:48.0 - 17:52.4] Are they coming in through EPM or they're not or when we're doing this engine to LSA?

Speaker 2: [17:52.4 - 17:55.4] Well, they will ultimately all be in any P. Yeah, right

Speaker 1: [17:55.5 - 17:57.5] So at that point in that perspective

Speaker 1: [17:57.5 - 18:02.7] So either you don't terminate them or if you do terminate them, right when you approve that contract or to get there

Speaker 1: [18:02.7 - 18:04.7] You're gonna auto-appoint them anyway

Speaker 1: [18:04.9 - 18:10.5] So they would get their appointments back depending on which way you go, right? Everything would happen anyway automated

Speaker 1: [18:10.5 - 18:15.5] So it's not like Kathleen's team's doing anything to that for the resident. It's gonna auto-appoint

Speaker 1: [18:15.5 - 18:18.2] It isn't gonna auto-appoint those non-resident though

Speaker 2: [18:18.9 - 18:25.0] Or the secure or the registration it doesn't auto-appoint for the registration. I'm worried about the registration

Speaker 2: [18:25.8 - 18:31.0] Because they have lost it like like we've done it like all right

Speaker 2: [18:31.0 - 18:35.7] So then you could always do it this way to like just have a simple check box as part of the termination, right?

Speaker 1: [18:36.0 - 18:43.0] Either you cancel it or you don't yeah. Yeah. Yeah, the geo can drive it right because they're asking you in a written text box

Speaker 2: [18:43.0 - 18:49.1] Please don't cancel this or that right? Yeah, I got a check box. So now yes EPM knows suppress the u5

Speaker 2: [18:49.5 - 18:51.5] now

Speaker 1: [18:52.2 - 18:56.8] You also have to take into consideration if they don't go forward now you've

Speaker 2: [18:57.5 - 19:02.0] Processed the termination you five is still active, but you haven't done any

Speaker 1: [19:02.0 - 19:08.2] Yeah, how are you gonna know that they they didn't go forward and there's an active you five from an automated perspective

Speaker 1: [19:09.2 - 19:12.3] Right, so there may have to be a check and a balance in there

Speaker 1: [19:12.3 - 19:14.5] Yeah, this is where it gets confusing there

Speaker 2: [19:14.5 - 19:20.4] Mm-hmm, right so that if they don't have that code number ordered where they can transfer it, then they don't get it, right?

Speaker 2: [19:21.4 - 19:24.6] It's gonna happen and then they got to do a you for all over again

Speaker 2: [19:25.3 - 19:27.3] I'm just saying you have to

Speaker 2: [19:27.8 - 19:34.2] Try to run a producer inquiry and it don't even allow them to move forward until it's it's ordered

Speaker 2: [19:36.9 - 19:42.7] Yeah, I don't see the most cases that I have like they've got it's they've got the other order like they're ready

Speaker 2: [19:42.7 - 19:44.7] Right, you know

Speaker 2: [19:45.0 - 19:48.9] Enter that in there or whatever and it can be transferred we figure out something, right?

Speaker 1: [19:49.0 - 19:54.0] You're gonna come back on a pre-hire. They're already registered. It's just a matter of assigning or moving those

Speaker 2: [19:54.6 - 19:57.2] Over to the new one and that's something we'd have to really talk about

Speaker 2: [19:57.5 - 20:03.9] Cuz Kathleen Marissa doesn't want you or your team doing another termination ever. That was her instructions. I love it

Speaker 1: [20:05.7 - 20:07.7] One of the primary goals

Speaker 2: [20:08.5 - 20:12.8] Take you home office out of these things and leave it at the field level

Speaker 2: [20:13.4 - 20:17.5] So we have to come up with the rules that govern them. Yep, okay

Speaker 1: [20:18.2 - 20:24.2] So now like okay, so let's stay on that train of thought right so you have to somebody who's got a

Speaker 2: [20:25.2 - 20:28.8] Those P tabs is approved gets registered

Speaker 2: [20:29.5 - 20:35.0] Right now all of a sudden is they 180 or 79 a day 179 a they have to get out

Speaker 2: [20:35.0 - 20:37.4] So they resign they ordered the new code number

Speaker 2: [20:38.5 - 20:44.2] We have to tell how does EPM gonna know that we have to transfer that over to the new code number that they've ordered

Speaker 2: [20:45.2 - 20:49.0] Right because now it's like it's not only just doing EPM, right that's fine

Speaker 2: [20:49.0 - 20:52.0] But we also have to how does the mainframe get that information?

Speaker 2: [20:52.0 - 20:55.6] Uh-huh, the new series 6 and the new series 7

Speaker 2: [20:56.2 - 20:58.4] Same one, but it's on a new code

Speaker 2: [20:59.8 - 21:05.6] So that's something really Kathleen you got to really think about what are we doing today and ladies gotta think about what are we doing?

Speaker 2: [21:05.6 - 21:06.6] today and

Speaker 2: [21:06.6 - 21:09.6] How can we try to automate that going forward?

Speaker 1: [21:09.6 - 21:11.6] Mm-hmm

Speaker 2: [21:13.0 - 21:19.1] For the PTS restarts, I think we are terminating everything in there. I think start over again. Yeah

Speaker 2: [21:20.3 - 21:25.5] We're not right is the agent to LSA or LSA the agent. I think that's the only time

[271] Speaker 2: Yeah, I mean you're not gonna have a bunch of non-res if you're a PTS restart

[272] Speaker 2: You're not going to have a bunch of jurisdictions, right?

[273] Speaker 2: Typically, so it's a little more straightforward.

[274] Speaker 2: Yeah, because I mean, we even tell them you may have to get fingerprinted again

[275] Speaker 2: if you got fingerprinted 12 months ago and you finally got contracted

[276] Speaker 2: and then you're a PTSD auto attorney, we may not even be nice enough

[277] Speaker 2: to repurpose your prints.

[278] Speaker 2: It depends on which one of us handles it and what kind of mood we're in that day

[279] Speaker 2: because some days I'm like, no, I'm going to get fingerprinted again.

[280] Speaker 1: That's funny.

[281] Speaker 2: No, I'm pissed, Cristina.

[282] Speaker 2: Yeah, no, I don't think so.

[283] Speaker 2: Far out of my offices.

[284] Speaker 2: No, I'm not.

[285] Speaker 2: So these are all those nuanced things.

[286] Speaker 2: So you've already decided on Pete as you don't do it.

[287] Speaker 2: They got to start over from scratch.

[288] Speaker 2: I don't even care.

[289] Speaker 2: So now now you're only looking at it from a LSA to a agent to LSA.

[290] Speaker 1: Yeah. Right. Yeah.

[291] Speaker 1: All right. So that that makes it a little bit different.

[292] Speaker 1: And that's one of the 18 permutations that we have to talk about anyway.

[293] Speaker 1: Yeah. Service reps.

[294] Speaker 2: OK. Yeah. OK.

[295] Speaker 1: All right. So that that that takes up a big chunk, right?

[296] Speaker 2: Pete has terms right and repurposing or getting, you know,

[297] Speaker 2: they're within the 180 and they resign and they come right back.

[298] Speaker 2: So that's fine. They have to do everything anyway.

[299] Speaker 2: Yeah. OK. Yeah.

[300] Speaker 1: All right. So again, it just that I guess the the point

[301] Speaker 1: the point is that you have to worry about the agent, the service rep

[302] Speaker 1: and vice versa. OK.

[303] Speaker 1: It makes it easier. Yeah.

[304] Speaker 1: All right. Then let's talk about volumes.

[305] Speaker 1: How many of those we see in a year or a month and a week?

[306] Speaker 2: You guys, I would say the agent agent to LSA does.

[307] Speaker 1: Yeah. What's that like?

[308] Speaker 2: Three, two in a week.

[309] Speaker 2: Well, two weeks, a hundred a year.

[310] Speaker 2: Yeah, that's about right.

[311] Speaker 1: Let's not get great.

[312] Speaker 1: Let's not get crazy about what you want to build for 100 a year

[313] Speaker 1: out of, you know, 20,000 transactions a year.

[314] Speaker 1: It's a drop in the bucket.

[315] Speaker 1: So you have to look at it from that perspective as well. Right.

[316] Speaker 2: I'm just saying that's that's my take on it.

[317] Speaker 2: You have to design for the masses, not for the one off.

[318] Speaker 2: Is the one awful kill you as far as development time and cost?

[319] Speaker 2: So if there's a little extra on the side, that's great.

[320] Speaker 2: But if not, that'd be my two cents on that.

[321] Speaker 1: Now, how about. Yeah.

[322] Speaker 1: So let's focus on the terminations for now, right?

[323] Speaker 2: That's technically is, but not.

[324] Speaker 2: So that that can be worked through.

[325] Speaker 1: So let's want to keep going on 1541.

[326] Speaker 2: Yeah. Yeah.

[327] Speaker 2: And I think roughly you mentioned this before, too, like

[328] Speaker 2: CCDs role in this because they play a prime role in this whole process.

[329] Speaker 2: Like what we do now is like if the G.O.

[330] Speaker 2: the current state, the G.O. says, yes, there's something in their background

[331] Speaker 2: that's not good or the G.O.

[332] Speaker 2: Smith's the reason of other term

[333] Speaker 2: that directly goes into CCD review for like 25 days.

[334] Speaker 2: They don't want to see a lot of this stuff anymore.

[335] Speaker 2: Right now, isn't that what Betsy was saying?

[336] Speaker 2: I know Marcia said it, too.

[337] Speaker 2: Yeah, they there's going to be conversations. Yeah.

[338] Speaker 1: So can you can you bring up the the matrix?

[339] Speaker 1: Just want to refresh the lady's memory.

[340] Speaker 1: Yeah. You have that available, Serena?

[341] Speaker 2: Yes. The metrics are.

[342] Speaker 2: Yeah. Yeah. The termination matrix. OK.

[343] Speaker 1: And then, you know, Kathleen, we can, you know, then get down to that.

[344] Speaker 1: But I remember having this conversation with Margaret and a bunch of other people,

[345] Speaker 1: the zones. Mm hmm.

[346] Speaker 1: Again, this is going back several years, right?

[347] Speaker 1: I think 2023. So it's things change.

[348] Speaker 1: Right. Mark, this is a lot of CCD review.

[349] Speaker 1: So it doesn't need to be here.

[350] Speaker 1: I miss Margaret. I love Margaret.

[351] Speaker 1: Well, yeah, you can never confuse where you stood with Margaret.

[352] Speaker 1: Now, that's why I always told you where you stood.

[353] Speaker 1: You know, let's see now.

[354] Speaker 1: Can you scroll down or scroll up whatever way you want to go down lower?

[355] Speaker 1: I want to see where we start, where the rules started.

[356] Speaker 1: Say. There was a spot in there

[357] Speaker 1: that we talked about the category issues, what CCD is going to see.

[358] Speaker 1: Is it this one? No, you go.

[359] Speaker 1: That's on auto terms.

[360] Speaker 1: Let's go to termination matrix.

[361] Speaker 1: Go to the first one. Yeah.

[362] Speaker 2: Sorry. No, that's OK.

[363] Speaker 1: All right. Here we go. Right there. Front center.

[364] Speaker 1: So where do you go?

[365] Speaker 2: All right, so this this was supposed to be what it was right there, right?

[366] Speaker 2: If the termination is caused or other term route to CCD,

[367] Speaker 2: so it's going to go to automatically, right?

[368] Speaker 2: Hold off on canceling appointments, doing all that.

[369] Speaker 2: If it's a cat, two or three disclosure reporting under a review task.

[370] Speaker 2: Well, this is a mess. Oh, my gosh.

[371] Speaker 2: How old these are. Yeah.

[372] Speaker 1: Are you going to auto route to test the CCD for review?

[373] Speaker 2: So this is how we are getting around the 1541.

[374] Speaker 2: Right. We're setting very high level

[375] Speaker 2: and letting them take a look at it.

[376] Speaker 2: Right. Like cat twos or cat threes were there.

[377] Speaker 2: Right. Disclosure reporting any of this type of activity.

[378] Speaker 2: For termination or resignation,

[379] Speaker 2: there shouldn't be any open cats because they would have all had to.

[380] Speaker 1: No, it doesn't matter. It wasn't it wasn't an open cat.

[381] Speaker 1: Oh, any on the record.

[382] Speaker 2: okay okay yeah that's that's really what it was supposed to be is any right to

[383] Speaker 2: ensure that you know did they need to do any disclosures and we terminating or

[384] Speaker 2: were they resigning because of that my god they're gonna look at every freaking

[385] Speaker 2: termination again we could go through it and say if they if they don't want to

[386] Speaker 2: see it when it's when it's open only open ones and not closed ones I think

[387] Speaker 1: you're right because he was like open right yeah you're correct so then if if

[388] Speaker 1: they if it's closed they don't want to know about it because we've already

[389] Speaker 1: hired them yeah or we or they've read you know someone's reviewed it at the

[390] Speaker 1: zone or standards level but these are the conversations to be had right again

[391] Speaker 1: going back and trying to refine it based off of these I know they want to see

[392] Speaker 1: less yeah sure so that's where it comes down to you know they that's why they

[393] Speaker 1: get rid of the 1541 questions right is the cat two or three basically addresses

[394] Speaker 1: any of any of those or disclosures or anything like that right so they it's a

[395] Speaker 1: questionnaire a lot of it is wrong half the time anyway they make them mark it

[396] Speaker 1: no what do we call the under FINRA review task again is that the FINRA

[397] Speaker 2: registration requirements test yeah yes requirements task yeah yeah so

[398] Speaker 1: Sarangma we'll have to update the user stories a you know like we like we did

[399] Speaker 1: on some of the others right find and replace on AMS change that VPN and then

[400] Speaker 1: for under FINRA review tasks that doesn't exist anymore in EPM it's called

[401] Speaker 1: FINRA registration requirements I have co-pilot on so we'll ask for the notes

[402] Speaker 1: and Rocco I think you had CCG doing the letters to the Department of Insurance

[403] Speaker 2: yes they're doing that under the disclosures already they're automating

[404] Speaker 2: right I don't know if Eric reached out to you or Tarun for the addresses did

[405] Speaker 2: you provide them with the addresses no I don't say they didn't reach out to me

[406] Speaker 2: but I'll be happy to give it to them yeah they just need these are the they

[407] Speaker 2: just need the DOI commissioners name and email address for that and they were

[408] Speaker 2: gonna automate all of that and awesome and the new RTS system okay so yeah

[409] Speaker 2: you're out of the letter business yeah is the DOI letter only needed in that

[410] Speaker 1: scenario or we're gonna have to account for that they were going to take care of

[411] Speaker 2: it when if it required right we're gonna notify CCD of the termination that they

[412] Speaker 2: need to look at whatever it is and then they would you know when they complete

[413] Speaker 2: it if it needs disclosures they're gonna manage it on their side we're just

[414] Speaker 2: not gonna bother we don't have to do anything but I'm saying that DOI letter

[415] Speaker 1: in itself right is that only a CCD thing yes so we don't need to worry about that

[416] Speaker 1: now okay the ones that make that determination whether it's even required

[417] Speaker 1: got it and they'll be sending them out so same with the u5 right they determine

[418] Speaker 1: whether they're gonna file the u5 or if it's just gonna go out as okay for

[419] Speaker 1: Kathleen to handle all right you said Tarun and Eric Eric Kohler oh you're

[420] Speaker 2: cool that's right okay yeah we remember that conversation yeah yeah we had the

[421] Speaker 2: strong arm uh-huh and he agreed at the end you know Eric no Eric no it was CCD

[422] Speaker 2: they were like yeah and then Eric's like oh yeah we can do that all right man I'm

[423] Speaker 2: gonna remind them we just need to bring their checkbook yes I would send just as

[424] Speaker 2: a friendly reminder I'd send it to Tarun say hey by the way don't forget for the

[425] Speaker 2: disclosures here's the list of commissioners and email addresses got it

[426] Speaker 1: yeah yeah let's do that Kathleen yeah it's a good way to bring it softly bring

[427] Speaker 1: it back up okay all right so I like it that's part I like that part very good

[428] Speaker 1: all right so we can go back to the 1541 Kathleen I just wanted to show you that

[429] Speaker 1: this was kind of get the rule set right that was most of what was going to take

[430] Speaker 1: care of the 1541 with these open rules here right and then we can't you go you

[431] Speaker 1: know ultimately once you get done talking through some of these points get

[432] Speaker 1: back in we'll go through the matrix right each one of these and make sure

[433] Speaker 1: it's valid still right before you guys meet with the you know compliance in the

[434] Speaker 1: zones right you want me to bring up the 1541 again yeah we go back to that just

[435] Speaker 1: so you know Nick wanted to see it sure a cutting-edge technology I know oh yeah

[436] Speaker 2: the mastery hey 2003 was ultra cutting-edge anything that didn't look

[437] Speaker 2: like mainframe or DOS I remember it was a mainframe screen wasn't it when you

[438] Speaker 2: mainframe online screen oh yeah this is what was that called I forget oh my god

[439] Speaker 2: I don't even remember I don't remember I'm like oh my god this is fantastic

[440] Speaker 2: Chick Corelli was

[441] Speaker 2: Master of that screen.

[442] Speaker 2: Yes, it was.

[443] Speaker 2: You had something in rumba, right?

[444] Speaker 1: My turn.

[445] Speaker 2: Yeah.

[446] Speaker 1: You did something in rumba.

[447] Speaker 2: Yeah.

[448] Speaker 1: All right.

[449] Speaker 1: So yeah, so these are all the questions, right?

[450] Speaker 1: It was a big enhancement when we set that edit,

[451] Speaker 2: that bottom box there.

[452] Speaker 2: They all know.

[453] Speaker 1: Yeah.

[454] Speaker 1: Yeah, click here.

[455] Speaker 2: Oh, yes.

[456] Speaker 2: It wasn't whether it was true or not.

[457] Speaker 2: The geopilot clicked them all.

[458] Speaker 2: Yeah, that was a big upgrade, man.

[459] Speaker 2: That was a big upgrade adding that checkbox.

[460] Speaker 1: You know what you're doing today?

[461] Speaker 2: Yeah.

[462] Speaker 2: Just to make people laugh, I think

[463] Speaker 2: this is foolproof, I don't see the problem with this.

[464] Speaker 2: But the amount of mistakes I've seen is incredible.

[465] Speaker 2: What they're doing is instead of submitting it

[466] Speaker 2: when you fill out all the information,

[467] Speaker 2: they save it instead.

[468] Speaker 2: So then it's stuck here.

[469] Speaker 2: It's in this pending queue.

[470] Speaker 2: And then I get really nice emails

[471] Speaker 2: in the IPS Terms mailbox.

[472] Speaker 2: This has been with you for 10 days.

[473] Speaker 2: Where is it?

[474] Speaker 2: Why is it processed?

[475] Speaker 2: And I go, I'm going to be very nice, but I'm Scorpio.

[476] Speaker 2: And I'm like, it's right under here.

[477] Speaker 2: And I'm like, check your pending queue.

[478] Speaker 2: I'm like, check your pending.

[479] Speaker 2: I'm like, you saved it and didn't submit.

[480] Speaker 2: I cannot tell you the amount of times that has happened.

[481] Speaker 2: Oh, it's because they do the letter

[482] Speaker 2: and send it to GeoDax, which is a nightmare.

[483] Speaker 2: And they type up the 1541 and save it

[484] Speaker 2: because you can't submit it until after the letter makes

[485] Speaker 2: its way to AWF.

[486] Speaker 2: And then they forget.

[487] Speaker 2: They forget.

[488] Speaker 1: Well, had you told me about two years ago,

[489] Speaker 1: I would have just taken the Save button away,

[490] Speaker 1: like we did for a pending one for Create a Marketer ID.

[491] Speaker 1: There used to be a pending there.

[492] Speaker 1: We got rid of that because people were just

[493] Speaker 1: generating and leaving them.

[494] Speaker 2: Yeah.

[495] Speaker 1: So.

[496] Speaker 1: But overall, I'm like, I don't, I mean, I think it's, I mean,
[497] Speaker 1: I've always thought this is pretty easy, but.
[498] Speaker 2: Yeah.
[499] Speaker 2: It is.
[500] Speaker 1: But it is.
[501] Speaker 2: It is.
[502] Speaker 1: So yeah, so Nick, the Geo enters that all, right?
[503] Speaker 1: And then it's just click Submit.
[504] Speaker 1: And then it sends it.
[505] Speaker 1: But only if the letter, as they were saying, is in AWF.
[506] Speaker 2: Yeah.
[507] Speaker 1: So it's a two part process.
[508] Speaker 1: And we did that because they were always
[509] Speaker 1: forgetting to send the letter, right?
[510] Speaker 1: So we go, OK, we're going to block them
[511] Speaker 1: from submitting a 1541 till they write the letter
[512] Speaker 1: and we get the letter.
[513] Speaker 1: And then can you bring up alerts, Kathleen, now?
[514] Speaker 1: So Nick can see the other half and Sarima
[515] Speaker 1: can see the other half.
[516] Speaker 2: Sure.
[517] Speaker 2: I know Natasha wants to see the other half.
[518] Speaker 2: She's like, no.
[519] Speaker 2: I don't.
[520] Speaker 2: I'm taking photos of my cat.
[521] Speaker 1: Oh, no.
[522] Speaker 1: Any butterflies yet?
[523] Speaker 2: They've been flying around, but I
[524] Speaker 2: haven't seen any eggs or larvae.
[525] Speaker 2: Yeah, I've had like seven so far.
[526] Speaker 1: Really?
[527] Speaker 2: OK.
[528] Speaker 2: Yeah, I just let one go this morning.
[529] Speaker 2: I did have a big luna moth on the trail.
[530] Speaker 2: It was still alive, you know, at dusk the other night
[531] Speaker 2: in my woods.
[532] Speaker 2: You know what a luna moth is, the green moth?

[533] Speaker 1: Yeah, yeah.

[534] Speaker 2: Just hanging out on a tree.

[535] Speaker 2: And I was like, they're so cool.

[536] Speaker 2: Wow, man.

[537] Speaker 2: I guess they're going to do these in the morning, right?

[538] Speaker 1: Yeah.

[539] Speaker 2: There's so much in red that I don't know.

[540] Speaker 2: I've asked Tim to remove them.

[541] Speaker 2: And I'm like, I don't know.

[542] Speaker 2: So like these in red, we're not back in April here.

[543] Speaker 2: But I don't know what it is.

[544] Speaker 2: I can't get them.

[545] Speaker 2: You're going to get an email about it, though,

[546] Speaker 2: tonight, so maybe they're already like that.

[547] Speaker 2: Hold on, man.

[548] Speaker 1: What happened?

[549] Speaker 1: Go back up.

[550] Speaker 1: I want to see the top of the list.

[551] Speaker 2: Ed Niemic, they fire him or he retires?

[552] Speaker 2: Niemic and Dyson, Niemic and Dyson are both gone.

[553] Speaker 2: They had to fire him.

[554] Speaker 1: No, no.

[555] Speaker 2: Rick said they retired.

[556] Speaker 2: I don't know if it was four or more.

[557] Speaker 2: There's a few MPs that we got.

[558] Speaker 2: Well, Dyson's a young, he isn't that old, man.

[559] Speaker 2: Unless he made his millions and he's had enough.

[560] Speaker 2: Yeah, no, they were, they're gone.

[561] Speaker 2: And I guess they're combining the two offices.

[562] Speaker 2: Oh, there you go.

[563] Speaker 2: Yeah, yeah, yeah.

[564] Speaker 2: All right.

[565] Speaker 2: Yeah, yeah.

[566] Speaker 2: Yeah, no loss.

[567] Speaker 2: Collateral damage.

[568] Speaker 2: Yeah, no loss.

[569] Speaker 2: Yeah, it's interesting.

[570] Speaker 2: It comes into this beautiful queue.

[571] Speaker 2: And you want me to pick an example?

[572] Speaker 1: Just.

[573] Speaker 1: Yeah, well, you could just show, yeah,

[574] Speaker 1: you can see basically, Nick, this is like,

[575] Speaker 1: can you go up though, Kathleen?

[576] Speaker 1: I guess to the top.

[577] Speaker 1: Just to show you, you go all the way up to the top.

[578] Speaker 1: See, this all goes away.

[579] Speaker 1: So you're looking at it, the source, right?

[580] Speaker 1: They're all, the 1541 are gonna be

[581] Speaker 1: the automated feed from HR.

[582] Speaker 1: But then the right-hand column was,

[583] Speaker 1: is, did the letter come in yet?

[584] Speaker 2: Yep.

[585] Speaker 1: Right, because if it's not received,

[586] Speaker 1: then no, you can't move forward, right?

[587] Speaker 1: You shouldn't even be here, really.

[588] Speaker 2: Nowadays, they shouldn't be there without the 1541.

[589] Speaker 2: Correct, so that's just basically, you know,

[590] Speaker 2: letting them know both pieces of the puzzle are there

[591] Speaker 2: so that the analysts can then go and process.

[592] Speaker 1: Do we need, a couple of questions.

[593] Speaker 1: Do we need a letter for auto term?

[594] Speaker 2: Yes.

[595] Speaker 2: Yes, yep.

[596] Speaker 1: Really?

[597] Speaker 2: Yeah.

[598] Speaker 1: Okay.

[599] Speaker 2: Yeah, because we gotta let them know.

[600] Speaker 2: So, auto term is gonna be the only scenario

[601] Speaker 2: where we're waiting for a letter.

[602] Speaker 2: Otherwise, you're creating the task

[603] Speaker 2: when you get the letter, right?

[604] Speaker 1: Is that?

[605] Speaker 2: So, today, a letter's needed for everybody

[606] Speaker 2: except for an NASD registered person,

[607] Speaker 2: non-registered person.

[608] Speaker 1: So.

[609] Speaker 1: Yes, but I'm talking about the sequencing

[610] Speaker 1: of when we actually start the task, right?

[611] Speaker 2: No, you still need a 1541 and a letter.

[612] Speaker 2: The geos always-

[613] Speaker 1: Right, so, but if you're manually creating the task,

[614] Speaker 1: why would you do that before the letter?

[615] Speaker 1: You're just gonna suspend it as a reminder?

[616] Speaker 2: That's what they're doing, and Kathleen says,

[617] Speaker 2: it's just what they always forget,

[618] Speaker 2: and then she shows them it's the pending queue.

[619] Speaker 2: Even going forward, it's not gonna matter, right?

[620] Speaker 2: You're gonna generate an auto term task, right?

[621] Speaker 1: FDAS or wherever it's coming from 2.0 or whatever the zone is going to approve it or whoever's going to approve it when they click

[622] Speaker 1: Approve it auto generates the auto term letter and sends it. It's like there's no one to be writing anything

[623] Speaker 1: It's the standard letter. It's not different, right? It's a template. You're just gonna plug in the appropriate name for the auto term

[624] Speaker 1: and

[625] Speaker 1: Then that should get filed in DMS and that's it. You're done, right?

[626] Speaker 1: There's no waiting for the letter because the system is gonna drink generate it, right?

[627] Speaker 1: Whether you send it to send it Nick, right you call it send it. Oh, I think we said Pfizer to send it doesn't have like

[628] Speaker 1: Bulk

[629] Speaker 1: Right. I just make an API call we can talk about that or we just have the store template right PDF

[630] Speaker 1: We create it and then we send a file to Pfizer. Yeah, right. They're doing that now for the Lotus notes

[631] Speaker 2: Yeah term letters the address change letters at a 2.0

[632] Speaker 1: Right, we're sending it directly to correspondence of course bondage just sends it to five separate mails

[633] Speaker 2: Yeah, so we talk back channel, but yeah, it's just the template especially now, right? They've

[634] Speaker 2: Consolidated all those termination letters into one right? Isn't that what John said John six? Yep. Mm-hmm, right so

[635] Speaker 1: Soon as it's approved whoever the final approver is for the termination

[636] Speaker 1: Now, you know and then this is really detailing it out who is that final approver do they get the reason correct?

[637] Speaker 1: Right, so that those are something you have to consider right again because if term other and term

[638] Speaker 1: Pro, you know go to compliance then they would be sort of the final approver, right if they agree

[639] Speaker 1: And then the letter just gets generated really, you know

[640] Speaker 1: I think it's all done at the very end not at the beginning like they do today

[641] Speaker 2: So for term other or the other scenarios Kathleen and team are the final approver today

[642] Speaker 2: Yep, so okay right now the alert system automatically if the geo selects a term other or

[643] Speaker 2: Yes to someone did the agent did something bad in the background. Yes, so any yes answer and

[644] Speaker 2: The term other will

[645] Speaker 2: Already be assigned to CCD like it's ready to go to CCD and the alerts queue and the alerts case

[646] Speaker 2: current state

[647] Speaker 2: But yeah, there's always been a

[648] Speaker 2: The case to with term other the geos picked her mother and it's probably not the best

[649] Speaker 2: Reason or or whoever did the geo whatever they picked her mother and a lot of times

[650] Speaker 2: I've seen it happen where the agent just is not responsive and they write that in the comments and it goes to CCD

[651] Speaker 2: CCD reviews it and they're they're probably like oh god, like there's no CCD language here, you know, but

[652] Speaker 2: this you know, this agent just goes to the geo so like stuff like that happens a lot where like

[653] Speaker 2: You know that reason comes from the geo but should they be picking the term other for that like that's like that's not

[654] Speaker 2: Like that's like someone aged up not being responsive. It's not a reason to go to CCD

[655] Speaker 2: So like then CCD would be the one saying no, this is not

[656] Speaker 2: Or it is a term other

[657] Speaker 2: Right because the agent has not responded is vanished from the office. I can't find them. So what do you put?

[658] Speaker 2: Yeah, but they may not have to disclose anything because the agent didn't show up, right?

[659] Speaker 2: So the CCDs response then back is yeah. Yes. It's it's a term other but no disclosure language or something, right?

[660] Speaker 2: Then it goes back to the geo or CCD when they said they just approve it right is they don't have to do anything

[661] Speaker 2: They look at it. Oh great. No. Yeah close it out right now

[662] Speaker 2: What are they doing? They're sending it back to you saying hey, there's nothing here, right? Yeah, nothing no to our language

[663] Speaker 2: No, you're done language and that's it. Yep. So they can say the same exact thing through a an action button, right?

[664] Speaker 1: And send it it would automatically send the legend auto-generate that letter

[665] Speaker 1: And send it

[666] Speaker 1: again, the object is to

[667] Speaker 1: Automate as much as possible. Take out someone doing all this duplicative work if CCD is the final

[668] Speaker 1: Decider, why do you have to see it again? Mm-hmm. They've made the decision. It's no nothing is nothing further required

[669] Speaker 1: Send it send it out. Mm-hmm. So that's just my two cents

[670] Speaker 1: Once decisions are made

[671] Speaker 1: Is it consistent no matter what the reason when we hold, you know

[672] Speaker 1: Is it don't we have to hold it for a certain period of time?

[673] Speaker 2: You said the first of them they get dated like 30 days

[674] Speaker 2: Yeah, there's no two-week notice or whatever right, you know, some of them like to give two weeks notice, but yeah

[675] Speaker 2: Okay, they're being nice, right so

[676] Speaker 2: Like after the 30 days is now or it references your term your letters been you're being terminated effective this date now FDA

[677] Speaker 2: Gets updated with the 30-day date. Mm-hmm. Yeah, right. So it is future dates the actual termination

[678] Speaker 2: Okay, so the DA the DA trans

[679] Speaker 2: goes the day you approve it, right?

[680] Speaker 2: But it's 30 days out.

[681] Speaker 2: Now, tank letters are held, right Kathleen?

[682] Speaker 2: Yep.

[683] Speaker 2: Yep, they're held.

[684] Speaker 2: To the effective date.

[685] Speaker 2: To the effective, Friday night of the effective date
[686] Speaker 2: that we, then they go, we notify client.
[687] Speaker 1: Okay, so help me out.
[688] Speaker 1: So if we do this, like, say we do the hold queue
[689] Speaker 1: or whatever, like I was talking about
[690] Speaker 1: before we update FDAS, you would have to send that file
[691] Speaker 1: to send it or Fiserv to generate the letter immediately.
[692] Speaker 1: Right?
[693] Speaker 1: On approval of termination.
[694] Speaker 2: Exactly, and then, and then put it in the queue, right?
[695] Speaker 2: Cause we're holding FDAS, we're holding tank
[696] Speaker 2: until those 30 days are up.
[697] Speaker 1: Am I understanding this correct?
[698] Speaker 2: I think that's a good approach.
[699] Speaker 1: Okay.
[700] Speaker 2: Mm-hmm.
[701] Speaker 1: Okay.
[702] Speaker 2: Yeah, cause a lot of times they do like the 30 days,
[703] Speaker 2: like the agent comes back and they don't want
[704] Speaker 2: to be terminated.
[705] Speaker 2: They're like, I'm just going to resign.
[706] Speaker 2: I want to resign.
[707] Speaker 2: And they're like, okay, fine.
[708] Speaker 2: The zone goes fine.
[709] Speaker 2: Resign, wherever it looks better.
[710] Speaker 2: So yeah, so then it's like, well, they want to resign,
[711] Speaker 2: but it's like, okay, like marketers already updated
[712] Speaker 2: with like June 18th.
[713] Speaker 2: So then I got to make manual updates to marketer
[714] Speaker 2: to make sure like, you know, to reflect their resignation
[715] Speaker 2: date and stuff like that.
[716] Speaker 2: So yeah, I liked, I liked the, the idea of having it
[717] Speaker 2: putting out hold until that date.
[718] Speaker 1: Okay.
[719] Speaker 1: So, and then it's just, the system fires it off, right?
[720] Speaker 1: You're not, there's no human that needs to go in there
[721] Speaker 2: and finalize it, right?

[722] Speaker 1: It's just 30 days out.

[723] Speaker 2: It's in the queue for 30 days and then it disappears

[724] Speaker 2: and it just goes, right?

[725] Speaker 1: I like it.

[726] Speaker 2: So like, but so saying they're in there for the 30 days

[727] Speaker 2: and then the person resigns and said, we would just need

[728] Speaker 2: to have some sort of options somewhere that, you know,

[729] Speaker 2: somebody knows, okay, now they're resigning

[730] Speaker 2: instead of terming.

[731] Speaker 1: How does it, we'd have to look at how that gets pulled

[732] Speaker 1: out of that hold queue too.

[733] Speaker 1: Well, if you hold all the downstream processing,

[734] Speaker 1: it should be fairly easy, right?

[735] Speaker 1: The only thing that's gone out to that point

[736] Speaker 1: is that agent letter.

[737] Speaker 1: Now here's the question I have, is there a risk involved

[738] Speaker 1: of not updating downstream in terms of them selling

[739] Speaker 1: something, Rocco, when they're not supposed to be selling?

[740] Speaker 2: They still can for 30 days.

[741] Speaker 2: Technically.

[742] Speaker 1: Okay.

[743] Speaker 1: What about for costs?

[744] Speaker 2: No, we generally suspend them though.

[745] Speaker 2: You guys, they said something depends, it depends.

[746] Speaker 2: So every zone tends to be, that's another thing.

[747] Speaker 1: Thank you for bringing that up, Christine.

[748] Speaker 2: I've noticed this with the established agent

[749] Speaker 2: termination letters.

[750] Speaker 2: Some zones have it in the language where they're like

[751] Speaker 2: suspend the agent from running business

[752] Speaker 2: and some don't have it.

[753] Speaker 2: So it's not consistent across the board.

[754] Speaker 1: Of course not.

[755] Speaker 2: So that's, thank you for bringing that up.

[756] Speaker 2: That's another factor.

[757] Speaker 2: Yeah, so sometimes with these 30 day terminations,

[758] Speaker 2: the zone will say in their termination letter,

[759] Speaker 2: you're suspended from soliciting New York Life Business.

[760] Speaker 1: Okay.

[761] Speaker 2: So that's another wrench in this, yeah.

[762] Speaker 1: That's for cause?

[763] Speaker 2: Could be other.

[764] Speaker 2: No, it could be, no.

[765] Speaker 2: It's usually, no, not for cause.

[766] Speaker 2: We don't get a lot of cause terminations, thank God.

[767] Speaker 2: But yeah, usually like the 30 day terminations,

[768] Speaker 2: usually it's like, maybe they did something wrong.

[769] Speaker 2: I don't know the exact reason.

[770] Speaker 2: Not proactive.

[771] Speaker 2: You weren't proactive.

[772] Speaker 1: Yeah.

[773] Speaker 1: Yeah.

[774] Speaker 1: How, Rocco, did we have any previous thoughts

[775] Speaker 1: on how we would manage those suspensions?

[776] Speaker 2: No, we didn't get that far.

[777] Speaker 1: Okay.

[778] Speaker 1: All right, so first I think we got to document

[779] Speaker 1: all the cases where that's needed, right?

[780] Speaker 1: Is it just term other?

[781] Speaker 1: Just streamline the process

[782] Speaker 1: and get all the zone crews on board

[783] Speaker 1: to do the two things the same way

[784] Speaker 1: so that when we build this-

[785] Speaker 1: That's the thing, yeah.

[786] Speaker 1: That would be, I think to me,

[787] Speaker 1: that would be a way to drive the consistency

[788] Speaker 1: so we still don't have four different ways of doing it.

[789] Speaker 2: No, we will.

[790] Speaker 2: We're gonna-

[791] Speaker 1: Yeah, there's only gonna be one way.

[792] Speaker 1: There's no, yeah.

[793] Speaker 1: That doesn't make no sense.

[794] Speaker 1: Just how EPM, there's only one way

[795] Speaker 1: to process certain things, right?

[796] Speaker 1: It's uniformity is why you're doing this.

[797] Speaker 1: Yeah, like I said,

[798] Speaker 2: Samantha can't decide to suspend and Charmaine not.

[799] Speaker 2: Yeah.

[800] Speaker 2: Yeah.

[801] Speaker 1: Okay, good.

[802] Speaker 2: Yeah.

[803] Speaker 1: So do we just get them-

[804] Speaker 2: Not that Samantha's gonna be suspending anybody anytime,

[805] Speaker 2: after 2.30-

[806] Speaker 2: I mean, does suspension go away?

[807] Speaker 2: It's either we take them out immediately or we don't

[808] Speaker 2: and let them sell for 30 days.

[809] Speaker 1: Are those the two-

[810] Speaker 1: Well, you gotta be careful because you,

[811] Speaker 2: By law, you have 30 days.

[812] Speaker 2: You have to give them 30 days for established agents.

[813] Speaker 2: It's a 30-day, it's regulatory.

[814] Speaker 1: So are we comfortable not suspending anyone then?

[815] Speaker 2: Well, there may be a valid reason to do it, you know?

[816] Speaker 2: He may have been a naughty boy

[817] Speaker 2: and they don't want him running around

[818] Speaker 2: selling cases and taking money.

[819] Speaker 2: Right, and I get that.

[820] Speaker 1: But so how does that manifest in what we're building, right?

[821] Speaker 2: Thought there is the zones are going to be initially reviewing these or creating

[822] Speaker 2: these yep for the most part so do we make it in like do we do a prompt before

[823] Speaker 1: they're done with it mm-hmm do you want to suspend the agent and then it splits

[824] Speaker 1: off something for your team to process the suspension I like that idea yeah

[825] Speaker 2: because it starts with them they're the ones that yeah they're their names on

[826] Speaker 2: that letter it's not that the establishment termination start with

[827] Speaker 2: them so they like a big old prompt does this yep termination come with the

[828] Speaker 2: contract suspension mm-hmm yes or no yep I mean we already look you know we

[829] Speaker 2: already know we need to build that task in EPM right for work authorizations

[830] Speaker 2: others other scenarios right like well then another scenario is I didn't renew

[831] Speaker 2: my resident license I have that have that happens in Virginia like you didn't

[832] Speaker 2: do your CE and then yeah you'd be on like the suspension are we addressing

[833] Speaker 1: that for PDB alerts don't like it's creating a task for that oh if you lose

[834] Speaker 2: your resident license and if you do then ultimately when terminations is an EPM

[835] Speaker 2: you can when you're processing that task process the termination either they

[836] Speaker 2: get it and you close it or yeah let's move forward to termination Christine's

[837] Speaker 2: never coming back all right great discussion that's good yeah I want to

[838] Speaker 1: get this group together reoccurring we'll start diving into the actual user

[839] Speaker 1: story previous you know content that we had in there and start refining it

[840] Speaker 1: and then we can start talking about all the various groups we need to set up

[841] Speaker 1: time with the zones CCD and we can kind of go from there but in terms of a

[842] Speaker 1: reoccurrence are we good with this time slot and you want to make it like once a

[843] Speaker 1: week twice a week what do you think Rocco

[844] Speaker 2: let's see where we at this is May 18th yeah yeah I would go if we can do twice

[845] Speaker 2: a week let's do twice a week yeah if the time permits this way you we can

[846] Speaker 2: refine the matrix that we have and then you know you got a schedule with the

[847] Speaker 2: business you know in CCD and standards and get all those folks buy-in as well

[848] Speaker 2: once you refine it so that could take a while especially coming into summer

[849] Speaker 2: right vacations you know how it goes yes right muscle let's go with the two

[850] Speaker 2: yeah like two to two to three on Mondays and then what other day work works good

[851] Speaker 2: for you guys or you know what let's do Tuesdays and Thursdays to avoid like

[852] Speaker 2: Mondays and Fridays because those are usually three-day weekends okay yeah

[853] Speaker 2: okay been two to three on a just this one Wednesday coming up on the 20th

[854] Speaker 2: which is which is this week we have an education session okay that's like I can

[855] Speaker 2: make one to two I don't know if anybody else can make one to two on Wednesday the

[856] Speaker 2: 20th if we're if we're starting we're dealing right in on this one to two on

[857] Speaker 2: Wednesdays is tough for me okay I can skip Kathleen's registration we can

[858] Speaker 2: start the two to three works on Mondays and Wednesdays just this Wednesday we

[859] Speaker 2: have our once a month education session it's only a monthly education session

[860] Speaker 2: I'll be here this Friday though I'm here too all right so Serena let's set

[861] Speaker 1: it up for two to three I'm on Mondays and Wednesdays and then once you set it

[862] Speaker 1: up maybe we can move the Wednesday one yeah or something right but we'll set it

[863] Speaker 1: up like that yeah or we could get a subset of you guys right yeah I mean I

[864] Speaker 1: could come to this and set the education session you yeah do that if we have to

[865] Speaker 1: split us up yeah that's not wrong yeah the education session I'll take this

[866] Speaker 1: and I'd like to get an extensive list of the stakeholders right and then the

[867] Speaker 1: meetings we need to set up with each one so and then use that as a legend going

[868] Speaker 1: forward all right all right
